

Attachment II

Regional Advisory Committee - Action Plan Projects

- Cimarron
 - Coordinate with agency partners on groundwater sustainability efforts
 - Provide support for Water Bank outreach and potential development within region

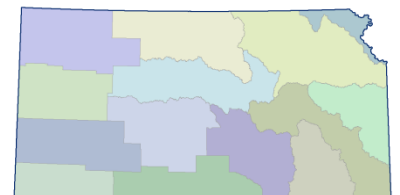

- Equus-Walnut
 - Coordinate with regional partners to provide public water supply long term water supply planning support
 - Coordinate with regional partners to provide reservoir sedimentation awareness opportunities within region.
 - Provide coordination support on remediation projects of contaminated sources of groundwater within Kansas including the Burrton Chloride Plume within the Equus Beds Aquifer.
 - Provide agency support for the establishment of water quality-related Water Technology Farms to evaluate the effectiveness of conservation practice implementation in reducing sediment and nutrient runoff on a whole field scale.

- Great Bend Prairie
 - Coordinate with agency partners on groundwater sustainability efforts
 - Provide agency support for public water supplies to improve efficiency of operations
 - Coordinate with agency partners to enhance groundwater chloride monitoring and potential remediation projects for contaminated areas.
 - Coordinate with agency partners for development of a feed wheat pilot project
 - Conduct watershed structure and Multipurpose Small Lake evaluation and assessment within region.

- Kansas
 - Complete necessary background work in support of a request to reallocate storage within Milford and Perry to reduce our future use storage debt service by several million dollars have not been initiated.
 - Coordinate with regional partners to provide reservoir sedimentation awareness opportunities within region.
 - Conduct watershed structure and Multipurpose Small Lake evaluation and assessment for sources of water supply within region
 - Coordinate public water supply efficiency improvement evaluation for water suppliers within region
 - Coordinate with agency partners to provide harmful algal bloom awareness and coordination efforts within region.

- Marais des Cygnes
 - Conduct feasibility analysis on storage reallocation at Melvern, Pomona and Hillsdale.
 - Coordinate with regional partners to provide reservoir sedimentation awareness opportunities within region.

- Missouri
 - Coordinate on the development of a groundwater quality and quantity assessment and evaluation
 - Coordinate with regional partners to provide reservoir sedimentation awareness opportunities within region.

Regional Advisory Committee - Action Plan Projects

- Neosho
 - Coordinate with regional partners to provide reservoir sedimentation awareness opportunities within region.
 - Conduct reservoir reallocation feasibility studies at Marion, Council Grove and John Redmond.
 - Coordinate with agency partners to provide harmful algal bloom awareness and coordination efforts within region.
 - Additional water supply storage assessment and evaluation
- Red Hills
 - Provide agency support to improve water use efficiency for all water use types within region.
 - Manage projects which analyze the viability of produced water treatment technologies.
- Solomon-Republican
 - Conduct water use alternative evaluation for federal reservoirs within region
 - Coordinate with regional partners to provide reservoir sedimentation awareness opportunities within region.
 - Provide interstate compact compliance awareness and outreach support on Republican River Compact issues.
- Smoky Hill-Saline
 - Reservoir water supply assessment and evaluation
 - Statewide water conservation education program implementation
 - Coordinate with regional partners to provide reservoir sedimentation awareness opportunities within region.
 - Provide agency support for public water supplies to improve efficiency of operations
- Upper Arkansas
 - Coordinate with agency partners on groundwater sustainability efforts
 - Provide agency support for public water supplies to improve efficiency of operations
 - Provide agency support to industrial water users to improve efficiency of operations
- Upper Republican
 - Coordinate with agency partners on groundwater sustainability efforts
 - Water use education and outreach
 - Provide interstate compact compliance awareness and outreach support on Republican River Compact issues.
 - Work with USDA-RMA on limited irrigation crop insurance policies which benefit producers and water use within region.
- Upper Smoky Hill
 - Coordinate with agency partners on groundwater sustainability efforts
 - Provide agency support for public water supplies to improve efficiency of operations
 - Coordinate with partners to provide livestock water use efficiency awareness and outreach activities
 - Provide agency support to industrial water users to improve efficiency of operations
- Verdigris
 - Conduct reservoir reallocation feasibility on Fall River Reservoir.
 - Coordinate with regional partners to provide reservoir sedimentation awareness opportunities within region.
 - Conduct assessment and evaluation on additional water supply storage within region.
